FIDLOCK®

The Fidlock concept

Based on a globally unique technology, Fidlock offers innovative, user-friendly fastener systems that revolutionise the market and its conventional solutions.

The Fidlock concept combines the advantages of a magnetic fastener with those of mechanical locking functionality.

3-point lock

	# 05170
for strap width	25 mm / 40 mm
Load capacity o.A.	Weight 44 g

The 3-point lock is the first magnetic and mechanical three-point fastener that can be operated with one hand. It is easy to open by sliding it to the side and closes simply and automatically thanks to the magnetic system. The fastener is ideal for use on items such as baby buggies and strap systems.

V-buckle 25

	# 07204
Load capacity 70 kg	Weight 22 g

The V-buckle 25 was developed for use in situations where security is important and for straps with a width of 25 mm. It opens by tilting the stainless steel flap. The greater the weight bearing against it, the more force is required to open it. This means that it is self-securing. It is therefore ideal for carrying babies or even for dog collars.

cube lock

	# 09013
Load capacity 60 kg	Weight 43 g

The SNAP cube lock is the innovative solution for secure attachment and adjustment of all kinds of objects, no matter how heavy. Thanks to the universal assembly option in 90° steps, various objects can be linked in connections that will never twist around.
